Rider/ horse pairs will be selected based on demonstrated success (not necessarily in shows) riding at least one level above the one they would be demonstrating. Effort will be made to select a variety of types and breeds of horses. Symposium leader Bill McMullin will be responsible for final selection of rider/horse pairs, based on review of rider applications by the SFDA. Interested riders also must express willingness to demonstrate the “wrong” way to ride particular parts of the tests, for instructional purposes.

What breed/type horse would you be you riding?

Please let us know how you and your horse are successfully working at one level above the level you wish to demonstrate and be instructed in at the Symposium. For example, provide information about show, clinic or other experience:

Are you willing to demonstrate both the correct way to ride a movement or part of a test and the wrong way?

Please note that we ask that no photos or videos be taken during riding demonstrations at the symposium!

Please mail this form, along with a check for pre-registration auditor fees, to:
